

7 SureFire Ways to Improve your Production

Where Industry Knowledge Meets Technological Expertise.

SureFire Systems, Inc. has been providing software to the window and door industry since 1996 and our employees are industry veterans with real life window and door experience. And now with SureFire ONLine MFG you can have a system designed for companies of all sizes while getting the benefits that the expensive systems offer at a fraction of the cost.

Go to our web site, surefiresys.com to see videos of SureFire ONLine MFG and SureFire ONLine and also company and product information.

Control Cost- SureFire ONLine MFG is a Module based system so you decide which modules are needed to fit the way you do business. Why be forced to pay for things you will never use. No large upfront License Fees, just a low monthly fee based on the Modules you choose for your business. Let us streamline your operation in ways you might have thought weren't possible.

Sales- Provide your customers with an easy to use Quoting/Ordering tool, SureFire ONLine. With its visual selection configurator, Drag and Drop Multi Unit Opening lay out screen, several different pricing methods including individual customer deals, it reduces the time consuming part of sales and frees up your sales force to Focus on new business. You can even receive your customers Orders electronically saving time and reducing errors for your Customer Service Department. Of course your own Sales people and Customer Service have the advantage of using the same tool. Our Sales Dashboard will provide you with a real time view of your customers quoting data. Private branding is available with SureFire ONLine. Saving employee time, reducing errors and sales analysis all equals more profit for the company.

Manufacturing- . The Production system is so easy to use it can bring a calmness to your employees during the most hectic days. We can improve efficiency, reduce errors and much more, so before you hire more employees you should look at making an investment in the best technology available. ONLine MFG can focus paperwork on specific departments, generate full cutting lists, split Orders for different production dates, print labels, and generate alignment drawings. With ONLine MFG your employees know exactly what they need to do. As the old saying goes "work smarter not harder".

Inventory- We make inventory easy for you, no need to have an Inventory Specialist. SureFire ONLine MFG will do conversion rates for you behind the scene. Get Purchasing suggestions based on On Hand and Allocated numbers and also have certain items like glass set to Auto Buy. Never worry again about the glass Purchase Order, we can do it automatically.

Shipping- Plan your routes, trucks and capacity based on production finished goods reporting. Simple to use and a great organizing tool. Easily changed based on daily production changes.

Accounting- Invoice right in the system and connect electronically with your current accounting package to save valuable time and reduce errors while ensuring accuracy.

Installation and Service- For Installing manufacturers SureFire ONLine MFG has a Drag and Drop calendar for scheduling installs and service. It includes work orders, debrief documents and installer pay schedules. Everything you need to have total control of that part of your business.

SureFire Systems, Inc. can change your world with innovation, technology and expertise!
